Keyword checks were scored against Dating

No explicit target keyword was supplied, so the engine auto-detected the strongest theme in the copy: Dating . To score against your real target term, re-run the audit with it set as the primary keyword; the recommended fixes below already work that term into the highest-value slots.

4 changes, ranked by impact

Ordered by how much each check moves your visibility, with policy-critical and high-impact items first. Each fix is written for this exact listing by the audit's AI fix-writer.

#1 • 5 pt

HIGH IMPACT

Title uses the 30-character budget

SEARCH & KEYWORDS

The current application title does not fully utilize the available 30-character limit for better keyword coverage.

RECOMMENDED FIX AI-tailored

Expand the title naturally by including high-value keywords such as **Dating**, **Meet Singles**, or **Online Dating** while keeping the title clear and readable.

#2 • 5 pt

HIGH IMPACT

Primary keyword appears in the title

SEARCH & KEYWORDS

Dating" appears in the title. This improves keyword relevance and Play Store visibility.

RECOMMENDED FIX AI-tailored

Update the title to include the primary keyword without affecting readability or branding.

#3 • 3 pt

MEDIUM IMPACT

Description length is substantial

CONVERSION

The Play Store description can be expanded to provide more detailed information about features, benefits, privacy, and user experience.

RECOMMENDED FIX AI-tailored

Increase the description length by highlighting core features, FAQs, user benefits, and naturally including relevant search keywords.

#4 • 1 pt

POLISH

Tone stays credible

CONVERSION

The current screenshots represent the application but can better communicate its main features and overall value.

RECOMMENDED FIX AI-tailored

Use professionally designed screenshots with short captions that highlight matching, chat, profile customization, and voice prompts.
